COVID-19: Navigating the Mental Health Effects on Older Adults

Presented by Kelly Sparks, RN, BSN, CWOCN, CFCN with Capital Nursing Education

In addition to the higher mortality rate of the COVID-19 pandemic among older adults, the virus is having a prolonged impact on seniors' mental health. In this webinar we explore how social isolation, depression and related health problems are currently impacting older adults, as well as methods to manage isolation and reduce harmful side-effects.

9am-10am Pacific Time (10-11am MT | 11-12pm CT | 12-1pm ET)

1 CE Contact Hour Available

Serious Illness and End-of-Life Care: Palliative Wound Care

Presented by Tracy Rodgers, RN, BSN, LNCC, RN-CLTC, WCC, DWC, Clinical Instructor with the Wound Care Education Institute/Relias

In palliative wound care, our approach to wound care is less aggressive. We shift our goals from healing and wound closure to promoting comfort and dignity, relieving suffering, and improving quality of life. In this session we'll explore the many challenges unique to palliative wound care.

11am-12pm Pacific Time (12-1pm MT | 1-2pm CT | 2-3pm ET)

1 CE Contact Hour Available

What is Incontinence-Associated Dermatitis (IAD): Assessment, Prevention and Management

Presented by Kelly Sparks, RN, BSN, CWOCN, CFCN with Capital Nursing Education

Incontinence-associated dermatitis (IAD) is a common skin injury resulting from exposure of skin to urine and stool. It is often found among seniors and less mobile individuals whose incontinence is managed with absorbent products. In this session, we cover the how, when and why of IAD, as well as solutions for recovery and prevention.

9am-10am Pacific Time (10-11am MT | 11-12pm CT | 12-1pm ET)

1 CE Contact Hour Available

Nutrition from A to Zinc

Presented by Dr. Nancy Collins, PhD, RDN, LD, FAPWCA, FAND, NWCC with the Wound Care Education Institute/Relias

A, B, C, D, Zn, Arg, Glu, HMB, and so many more! When it comes to deciphering the nutritional components necessary for wound healing and Dx management, these nutrients can be alphabet soup. In this session, we cover the important macro- and micronutrients needed for an optimal daily diet.

11am-12pm Pacific Time (12-1pm MT | 1-2pm CT | 2-3pm ET)

1 CE Contact Hour Available

Identifying and Preventing Catheter-Associated Urinary Tract Infections (CAUTI)

Presented by Kelly Sparks, RN, BSN, CWOCN, CFCN with Capital Nursing Education

Catheter-associated urinary tract infections are one of the most common healthcare associated infections. For individuals with Dx such as spina bifida, MS, or cerebral palsy, CAUTIs can also present unique challenges. In this session, we explore best practices for identifying and preventing CAUTIs and their impact on some vulnerable populations.

9am-10am Pacific Time (10-11am MT | 11-12pm CT | 12-1pm ET)

1 CE Contact Hour Available

Communicating with Individuals with Alzheimer's/Dementia

Presented by Kelly Sparks, RN, BSN, CWOCN, CFCN with Capital Nursing Education

Alzheimer's and dementia affect both how people express themselves, as well as how they understand what is being communicated to them. In this webinar we explore how these diseases alter communication, and learn some useful strategies to help us successfully communicate throughout the progression of the disease.

9am-10am Pacific Time (10-11am MT | 11-12pm CT | 12-1pm ET)

1 CE Contact Hour Available

Mysteries of Wound Care

1 CE Contact Hour Available

Presented by Tracy Lynn Rodgers RN, BSN, LNCC, RN-CLTC, WCC, DWC

This course covers 5 of the factors important for wound healing. Barriers to wound healing such as inappropriate moisture balance, decreased oxygen levels, medications and other impediments to healing are discussed. Finally, must-have wound care products and myths about wound healing are described.

11am-12pm Pacific Time (12-1pm MT | 1-2pm CT | 2-3pm ET)

Overactive Bladder-Don't Let it Run Your Life

1 CE Contact Hour Available

Presented by Kelly Sparks RN, BSN, CWOCN, CFCN

In this presentation, we will be looking at the effects that an overactive bladder can have on a person's life. We will explore some of the causes and some of the most up to date treatments. We will look at pelvic floor muscle rehabilitation, timed voiding, and other methods of calming the bladder.

9am-10am Pacific Time (10-11am MT | 11-12pm CT | 12-1pm ET)

Part 1: Type 2 Diabetes

1 CE Contact Hour Available

Presented by Kelly Sparks RN, BSN, CWOCN, CFCN

Type 2 Diabetes is the most common type of diabetes. In this presentation, we will be discussing Type 2 Diabetes. Approximately 1 in 10 Americans have diabetes and approximately 90-95 of them have Type 2 Diabetes. We will look at what Type 2 Diabetes is, along with the symptoms, causes, diagnose, and management. This will also include a discussion of how to prevent Type 2 Diabetes.

9am-10am Pacific Time (10-11am MT | 11-12pm CT | 12-1pm ET)

Renal Function & Micturition

1 CE Contact Hour Available

Presented by Kelly Sparks RN, BSN, CWOCN, CFCN

This presentation will include renal function and micturition. We will look, in depth, at how the kidneys work as well as the functions of the bladder. This will include the regulation of blood pressure, nephrotoxicity, and kidney failure. We will look at the process of micturition and what can cause problems during micturition.

9am-10am Pacific Time (10-11am MT | 11-12pm CT | 12-1pm ET)

Part 2: The Effects of Type 2 DM on the Body

1 CE Contact Hour Available

Presented by Kelly Sparks RN, BSN, CWOCN, CFCN

In this presentation, we will look at ways to prevent Type 2 Diabetes, and the effects of Type 2 Diabetes on the body. This will include people over 45 as well as teens and children. We will discuss what can happen if the Type 2 diabetes remains out of control. This session will include diabetic nephropathy, Retinopathy, as well as the skin issues.

9am-10am Pacific Time (10-11am MT | 11-12pm CT | 12-1pm ET)

Tubes & Their Uses

1 CE Contact Hour Available

Presented by Kelly Sparks RN, BSN, CWOCN, CFCN

This presentation will include identification of type of feeding tubes and the accessories used. We will demonstrate appropriate techniques for formula and medication administration. There will be discussion on the characteristics of malnutrition and recognizing patients at risk. We will also look at the optimal tube site care. Recognizing and troubleshooting complication of tube feeding will also be presented.
